

LONGINES RANKINGS/JUMPING - CALCULATION FOR 2017 LISTS

Generals

The list for the Longines Rankings takes into account the points obtained over a twelve month period beginning on 1 January and ending on 31 December.

The list for the Longines Rankings is produced by the FEI Headquarters.

The list for the Longines Rankings is updated weekly but is released on the first week of each month only. The updated version during the month is not published or distributed, except for specific purposes (FEI World Cup™ invitations, selection for Top Ten Final etc).

The list for the Longines Rankings begins on 1 January each year with the carryover of the total number of points which have been accumulated during the previous year until 31 December.

At the end of each month, the points earned during that month are added to the list. The points from the same month the previous year are dropped from the list.

Points obtained at Games and Championships are retained on the list depending on the frequency of the events. If the event is held every four years, 25% of the points obtained are dropped after one year, 50% after two years, 75% after three years and the remainder after four years. If the event is held every two years, 50% of the points obtained are dropped after one year and the remainder after two years.

Athletes may request a maternity leave providing the pregnancy is certified in writing by a medical doctor. During the period which an athlete has officially ceased to compete due to pregnancy, she will retain 50% of the Longines Rankings points earned from the corresponding month of the preceding year until she recommences competing internationally. The maximum length of time an athlete may benefit from this leave of absence at one time is twelve months. The athlete concerned must inform the FEI Jumping Director when she resumes international participation.

In order for a competition to count for the Longines Rankings, the prize money distribution charts published in the Draft Schedules must be respected. The value of the first prize, in cash and/or in kind, may not exceed one third (rounded for calculation purposes to 33%) of the total value of prize money and prizes in kind offered for the competition. For competitions in which the retail value of the prize in kind for the winner **EXCEEDS** 33% of the total value of prizes offered for the competition, only 33% of the total value of the prizes offered for the competition is taken into consideration for 1st place for the purpose of determining whether the competition counts for the Longines Rankings and into which point group it should be placed (AA/A/B/C/D). Therefore, the prize money provided for athletes placed 2nd to 12th is considered to represent 67% of the total prizes offered for the competition and must be distributed according to the percentages laid down in the prize money distribution Chart 2 (33% to the winner). In order to achieve this, the total value of the prizes offered for the competition must be recalculated based on the premise that if the first prize represents 33%, the prizes provided for 2nd to 12th represent 67% of the total value of prizes offered for the competition (100% = 33% + 67%). The calculation is to be made as follows:

The amount of prize money offered for athletes placed 2nd to 12th is multiplied by 100 and divided by 67. The amount obtained through this calculation is the "recorded" value (100%) of the competition for Longines Rankings purposes.

Example: A competition is listed in the Schedule with a total value of prizes of € 97'000, of which a car with a retail value of € 47'000 is offered to the winner and € 50'000 cash is provided for athletes placed 2nd to 12th. The recorded value (100%) of the competition for Longines Rankings purposes is equal to the value of the prizes provided for 2nd to 12th places (50'000) multiplied by 100 and divided by 67: $100\% = 50'000 \times 100 \div 67 = € 74'626.86$ /rounded to 74'625 (instead of 97'000). The recorded value of the car is considered to be 33% of this amount: 33% of 74'625 = 24'626.25/rounded to 24'625 (instead of 47'000). As the recorded value of the competition exceeds € 24'000 it may count for the Longines Rankings and it falls into point Group C: € 60'500 – 90'499 (instead of point Group B: € 90'500 – 150'999). The € 50'000 prize money is distributed among the athletes placed 2nd to 12th according to the percentages listed in prize money distribution Chart 2, using the recorded value of the competition (€ 74'625) as the basis for calculating the percentages.

NB: The above applies to cases in which the retail value of the prize in kind for the winner greatly exceeds 33% of the total value of prizes offered for the competition; a certain degree of flexibility will be applied if the value of this prize in kind represents approximately 33%. Should the retail value of the prize in kind for the winner be less than 33%, additional prize money must be provided

Rules for the Longines Rankings

to meet the required percentage.

Point System

Competitions are divided into groups depending on their level. *Refer to definition of Groups.*

For Individual competitions, Athletes obtain points related to their placing in the competitions. The scale of points differs from one group to another. *Refer to scales of points.*

For Team competitions, Athletes obtain points related to their results. If they obtain four penalty points or less in at least one of the rounds, they earn points. *Refer to Nations Cup.*

For Olympic Games, Pan-American Games, European Championship (Seniors), FEI World Cup™ Final and Asian Games, the first three placed Athletes obtain bonus points in addition to the points obtained during the competitions. *Refer to bonus.*

The 16 best placed Athletes (plus the Athletes tying for the last place to count) will obtain points in all individual competitions counting for the ranking. Points won by Athletes who are tied are added up and divided equally among them. Two decimals are kept. The second decimal place will be rounded up from .005 and rounded down from .004.

Athletes placed more than once in the first 16 obtain points for their best placing only.

Competitions excluded: Special competitions, meaning show competitions or competitions for which participation is based on personal invitations or for which not all Athletes at the event have the chance to qualify (such as Top Ten, Masters, rotating Horses [n/a to Rotating Individual Final at FEI World Championship]), Knock-out, Puissance, Six-bar, Relay, Top Score, Fault & Out, Hit & Hurry, Take Your Own Line and team competitions other than Nations Cup.

There will be no limit on the number of competitions per event which count for the list for the Longines Rankings provided they meet the criteria of a group.

Number of results to count for the list for the Longines Rankings

The number of results to count per Athlete per year for the list for the Longines Rankings is limited to the best 30. For the purpose of qualifying for the Olympic Games, the number of competitions to count will be limited to 30. Conditions for qualifying for the Olympic Games are laid down in the Rules for Equestrian Events at the Olympic Games.

Horse/Athlete Combination Ranking List

In accordance with the above rules a ranking list for the Horse/Athlete Combination is established each year. If one of the two elements forming the combination changes during the year, the points start again from scratch. This list begins for each combination with zero point on 1 January and finishes on 31 December (only the points of the current year are taken into account; there is no carryover of previous championships or Games points).

Definition of Groups

Individual Competitions: The minimum height of all competitions counting for points is 145 cm (NB: exception for the first and last competitions of Regional or Continental Games or Championships as mentioned under Group E)
